## About Me

I'm thrilled to introduce myself as a front-end developer. In this fast-paced digital world, where user experience is paramount, I am passionate about crafting visually appealing and user-friendly web applications. With a solid foundation in HTML, CSS with preprocessors like Sass and frameworks like Tailwind, and JavaScript with the modern library React.js. I bring creativity, problem-solving skills, and strong attention to detail to every project I undertake.

## Skills

- HTML, CSS
- SASS, Tailwind
- JavaScript, Typescript
- React JS, Next JS
- Git, GitHub
- Docker, AWS
- System Desing
- Design Patterns
- Software Architecture and Design

## Education

### **Software Engineering Diploma**

Aptech International – 2018 – 2021

### **Bachelor of Computer Science**

Karachi University – 2019 – 2022

## Projects

### **E-commerce Store Website**

- Used React Js to develop an Ecommerce website
- Fetch products from the Rest API by fetch method to display on the web page
- A single product and a cart that has local storage to store and retrieve products
- And Used Vanilla CSS and Bootstrap for UI

### **Sportfolio**

- Develop dynamic exchange of sports team with React JS
- Used React Router and React Slick Slider
- For UI I used Vanilla CSS

## Experience

**2 years development experience**
